this book examines the way in which globalisation has affected our thinking about sovereignty human rights law and legitimacy

this book is a critique of the regressive nature of modernity the biopolitical necropolitical and colonial character of global capitalism and the subservience to such a system in the former yugoslavia by relying on leftist and decolonial theoretical apparatuses this work addresses the coloniality of power as a contemporary form of colonialism through which developed countries monopoly on the definition of concepts like reason freedom and progress continues the critique of representation and perception of these concepts as ideologically neutral is in these terms the main point of approach to the analysis of the entanglement of capitalism and colonialism on both a wider scale and in the periphery it is argued therefore that coloniality permeates the contemporary architecture of power and capitalist modes of production which results in suppression pacification of pro equality struggles and the depoliticization of social political realities as well as ideology itself hence one of the main theses is that commitment to the eurocentric notion of progress and knee bending to the post ideological ideology lead only to the next iteration of capitalism so if yet another version of the capitalist colonial order and its democracy is seen as a solution this book wants to be a part of the problem

the political dimension of arms control has always had special significance for the federal republic of germany not only because of the issue of a divided germany and a partitioned europe but also because of the country s key position in the western security alliance in the wake of nato s recent decision to deploy more nuclear weapons on german soil and in the absence of progress on arms control it has become clear that arms control measures and negotiations have assumed an

importance far beyond their military technical components fundamental questions about the nature of east west relations and the future shape of the transatlantic alliance and the european political order also have been raised these essays explore the implications of arms control negotiations for the federal republic of germany and consider why germany has traditionally found it impossible to divorce considerations of arms control from their larger political context

why do america s public schools seem unable to meet today s social challenges as competing interest groups vie over issues like funding and curricula we seem to have lost sight of the democratic purposes originally intended for public education public schools were envisioned by the founders as democratically run institutions for instilling civic values but today s education system seems more concerned with producing good employees than good citizens meanwhile our country s diversity has eroded consensus about citizenship and the professionalization of educators has diminished public involvement in schools this volume seeks to demonstrate that the democratic purposes of education are not outmoded ideas but can continue to be driving forces in public education nine original articles by some of today s leading education theorists cut a broad swath across the political spectrum to examine how those democratic purposes might be redefined and revived it both establishes the intellectual foundation for revitalizing american schools and offers concrete ideas for how the educational process can be made more democratic the authors make a case for better empirical research about the politics of education in order to both reconnect schools to their communities and help educators instill citizenship an initial series of articles reexamines the original premise of american education as articulated by important thinkers like jefferson and dewey a second group identifies flaws in how schools are currently governed and offers models for change a final section analyzes the value conflicts posed by the twin strands of democratic socialization and governance and their implications for education policy spanning philosophy history sociology and political science this book brings together the best current thinking about the specifics of education policy vouchers charter schools national testing and about the role of deliberation in a democracy it offers a cogent alternative to the exchange paradigm and shows how much more needs to be understood about an issue so vital to america s future
